

Mr. Greg Munt

Background: more than 35 years' experience in the patent profession, including 3 years in-house at an Australian mining company and 33 years as a Principal at Griffith Hack, including secondments with clients while at Griffith Hack.

Experience: Greg works for a small group of clients in the mining, minerals processing, metals production and downstream metals/alloys processing industries. The clients are involved in minerals processing, including flotation technology, pyrometallurgical technologies, titanium metal/alloy production, large scale production of electricity from solar energy, mining equipment and methods of mining, coating technologies, and continuous steel strip production. The clients require advice on IP issues in Australia and overseas. A key part of Greg's work is drafting patent specifications and filing and prosecuting patents applications to grant in Australia and other countries.
